WORKING GROUP MEETING ON RESEARCH INFRASTRUCTURES AND HERITAGE SCIENCE CAREER PATHS

University of Bologna
Chemistry Department “G. Ciamician”
Via F. Selmi 2, Bologna
25-26 January 2024

The working group meeting is jointly
organised by IPERION HS and E-RIHS IP

Given the experience with conservation science and heritage science courses at masters and doctoral levels in Italy, the UK and elsewhere, and given the growth of the field, it has become clear that an assessment and clear communication of the potential career paths has become long overdue.

The rapid development of the heritage science domain and its diversity may represent a significant difficulty to potential entrants into the field. A recent IPERION HS questionnaire highlighted an enormous diversity of academic backgrounds, spanning SSH, STEM and other domains, as well as of jobs filled by heritage scientists. Some of these jobs are in academia and research institutes, others in public bodies, industry and elsewhere, including research infrastructures. It is clear that diverse skillsets are required to cover this range of jobs.

The working group presentations and discussions will examine the provision of heritage science education, the skills necessary for employment in different heritage science sections and employers, as well as the typical heritage science career paths.
